Claims 1-23, 25, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hall (US 2403277).

Hall discloses substantially all the claimed features including an access panel 2 with an aperture 17. That the exterior surface of the access panel has a facial indicia of an animal, human, or alien would have been an obvious matter of ornamental design choice to a person having ordinary skill in the art based on ornamental preference, providing no new or unexpected results. In other words, the ornamental design of the exterior surface of the access panel would have been an obvious matter of ornamental design choice to a person having ordinary skill in the art based on ornamental preference, providing no new or unexpected results. Hinged housing panels, covers, doors, etc., are old and well known in the art; therefore, to make the access panel hingedly connected to the housing would have been obvious to a person having ordinary skill in the art to facilitate opening and closing.

Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hall (US 2403277) in view of Ewald (US 2286904).

The shape of the housing, i.e. spherical, would have been an obvious matter of ornamental design choice to a person having ordinary skill in the art based on ornamental preference, providing no new or unexpected results. Ewald discloses another similar apparatus in which the housing is almost spherical; to make the housing of Hall generally spherical as taught by Ewald would have been obvious to a person

Art Unit: 3654

having ordinary skill in the art for aesthetic purposes and to eliminate sharp corners to reduce injuries.

Applicant's arguments filed 8/26/03 have been fully considered but they are not persuasive.

As noted above, that the exterior surface of the access panel has a facial indicia of an animal, human, or alien would have been an obvious matter of ornamental design choice to a person having ordinary skill in the art based on ornamental preference, providing no new or unexpected results. Applicant has provided no argument which proves that the particular claimed design, i.e. a facial indicia of an animal, human, or alien, is significant or is anything more than one of numerous design configurations a person of ordinary skill in the art would find obvious for the purpose of ornamental design.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
